## Conference at a Glance

The multiple goals of the conference are: to explore Fryderyk Chopin as a composer, a master of Romantic music, and patriot; to look at Ignacy Jan Paderewski as a pianist, composer, philanthropist, diplomat, politician, and Prime Minister of the Republic of Poland; and to place Chopin, Paderewski, and Poland's struggle for independence in the context of American and world culture and politics of the nineteenth and twentieth centuries.

Participants include international scholars, historians, professors, critics, journalists, authors, poets, musicians and performers.
